<h3>
Status for week ending 4/2/2001</h3>
1. Implemented a workaround for the recently found bug in VL5 plugin. If
two users sign in from a web browser in succession, this bug results in
the second user being authenticated as the first user. The problem is caused
by a authentication cookie set by the VL5 plugin when the first user logs
in; this cookie is not regenerated when a second user logs in, but is instead
reused, resulting in the second user being authenticated as the first.
<p>The workaround clears the VL5 cookie during logout from Shopping List;
a new cookie is then generated by VL5 when a new user logs in. After this
workaround is tested on QA server, installation of Shopping List Release
1.1 on production servers will be scheduled.
<p>2. I started installing and running the Search service on a new UltraSparc
machine; I could not run Search on my Sparc20 system, landscape, because
Search software requires UltraSparc systems.
<p>The DCI team has not yet implemented the proximity search interface
and are also yet to send us the DCI Franchise Ids for the initial list
of Local Store merchants.
<h4>
Next Week:</h4>
1. Continue testing of VL5 plugin.

2. Work on implementation of Local Stores.

3. Support CTA Banner service and Shopping List.</html>
